

Career Opportunity

.Net Architect

Decision Dynamics Technology Ltd. is looking for a diverse and exceptional individual to join our team as a .Net Architect in our Calgary Office.

As the .Net Architect will join our team as a technical lead and mentor. You will set standards corporate wide in a multi-tier, database-driven, client server, internet and web development environment using Microsoft development tools.

As the successful candidate you are known to be an active proponent of developer driven unit testing, continuous integration and other practices that enable a lean and agile development approach.

Responsibilities

- Providing in-depth guidance and leadership on application architecture and design, development and deployment standards, and production environment design.
- .Net Architect will be responsible for understanding and communicating to business representatives, application developers as well as other technical resources in order to gain common understanding and approval of conceptual solutions and detailed solution designs.
- The role also encompasses solution design architect and requires strong software development, analysis, architecture, design and basic information technology skills to work with business sponsors, enterprise architect and solution development teams to define conceptual solutions and developed detailed design documents.

Qualifications

- A minimum of 10 years experience in the software industry, 5 of which have been in Microsoft Windows application development
- Advanced knowledge of C# / .NET
- Extensive experience in server side development including design and implementation of web services based solutions, and n-tier application architecture is mandatory.
- Experience with enterprise portal architecture, design, security, deployment and governance would be a definite asset.
- Experience in .Net Framework, C# (or VB.Net), ASP.Net, JavaScript, Oracle, IIS, MS Visio
- Prior Architecture experience using .Net or Java technologies is highly preferred.
- Expertise in implementing Service Oriented Architecture solutions.
- Excellent communication, organizational, and interpersonal skills.
- Database Design and Architecture with Oracle .MS Sql

- Minimum of 3 years experience in Internet systems design/architecture in a commercial environment with large systems and a large user base as well as 3 years experience in requirement definition, systems development life cycle methodology and team leading.
- Demonstrated ability to influence technical and business groups.
- Ability to understand the high level architecture and recommend architectural solution
- Good negotiation and problem solving skills.
- A degree in Computer Science or related field
- Experience Using Object-Oriented Analysis and Design (OOA/D) concepts and tools.
- Knowledge of, and experience using, UML

If you meet the above requirements, and are interested in this opportunity, please forward your resume and cover letter via e-mail to resume@ddytech.com with .Net Architect in the subject line.

No relocation will be provided.

No agencies please.

We thank all applicants, however, only those candidates selected for an interview will be contacted. No phone calls will be accepted.
